Satin Vegan Cake

Takes the challenge out of making vegan baked goods

Consumers are continuously striving for healthier lifestyles, creating the need for more vegan options. The new 2019 Canada's Food Guide emphasizes the importance of eating plant-based foods for good health. In fact, the 2018 Puratos Taste Tomorrow study revealed that 60% of Canadians want to incorporate a more vegan diet. As a result, the demand for vegan alternatives to every day foods is on the rise, including vegan baked goods.

We firmly believe that vegan patisserie options should not have to compromise on taste or texture. That is why we have introduced our Satin Vegan Cake Mix that provides the quality and versatility you are looking for in a cake mix, while taking the challenge out of making vegan baked goods.
